

HOW CAN A

SPINAL CORD INJURY

CHANGE YOUR LIFE?

Spinal cord injuries are one of the most devastating injuries that you can receive as the result of an accident. Spinal cord injuries can be life-altering, and even if you can recover from the injury, they normally have a permanent impact on your life.

THE LEADING CAUSES OF SPINAL INJURIES ARE:

CAR ACCIDENTS

TRUCK ACCIDENTS

SLIPPING & FALLING

MOTORCYCLE ACCIDENTS

MEDICAL & SURGICAL COMPLICATIONS

WORK-RELATED ACCIDENTS

SOME OF THE SYMPTOMS THAT COME WITH SPINAL CORD INJURIES ARE:

Full or partial-body paralysis - A spinal cord injury can cause various types of paralysis depending on which part of the spine is damaged: **Hemiplegia**, which is total paralysis on one side of your body; **paraplegia**, which is the paralysis of your lower body; and **quadriplegia**, which refers to paralysis of your arms and legs.

RECURRING MUSCLE SPASMS

JOINT OR NERVE PAIN

LOST SENSE OF TOUCH

IMPAIRED BODILY FUNCTIONS

However, spinal cord injuries are not limited to physical symptoms. It is common that victims of a spinal cord injury will also face emotional turmoil as well.

Those symptoms can include:

ANXIETY

DEPRESSION

DECREASED QUALITY OR ENJOYMENT OF LIFE
